

MELANIE_TEST_PHRASE_123

Team Standards

- Use branch names like `feat/...`, `fix/...`, and `chore/...`
- Write commit messages using our agreed format: `feat(be): ...`, `feat(fe): ...`, `fix: ...`
- Open a pull request for every feature and get at least 1 review before merging.
- Do not push directly to `main`; keep `main` stable and deployable.
- Keep PRs small and focused so they are easy to review.
- Update `project_plan.md` before building a feature and keep spec + code aligned.
- Treat API contracts as the source of truth for request and response shapes.
- Return clear, consistent error messages in backend endpoints.
- Never commit secrets or tokens; keep them in `.env` files only.
- Include brief test evidence in PR descriptions (what was tested and results).
